Pääрни, [\*Risto Anton\*](#)

Espoo, Finland

## Summary

My name is Risto Anton Pääрни, [M.Sc./B.Sc.](#) He is passionate about helping customers, focusing on Consulting Client assignments and the building and architecting the Lifetime's project Montreaux - Lifetime Digital Workspace for Intelligent Industries (dws41), an InvestEU approved, EBAN funded project at the moment.

As an IT Professional, I offer three hats to your team. My Triathlonist skills are for the roles of agile Scrum Project Manager, Cloud Solutions Architect, and Cloud Developer.

My Research interests are building solutions based on AI and ML Services on the edge and on the cloud, serverless containerised application development DevSecOps and its security solutions i.e. Post-Quantum, and building applications and managing containerised CICD fleets.

As CEO of Lifetime Group my backlog of duties include solution sales, client assignments with consultative sales approach, business development, funding, innovating products and services, brand management, leading the teams and managing client projects, seeing over the operations of the company, HR, marketing, management accounting, and nurturing client and partner relationships at the Lifetime Certified Partners Consortium.

Risto Anton has cloud experience for more than 7 years. He is an experienced PM/ cloud solutions architect/ developer with extensive knowledge of customer business cases built on services on AWS, Microsoft Azure, Google Cloud, IBM Cloud.

Lifetime Group

## Education

- Smart Factory Program in Metropolia University of Applied Sciences, ylempi ammattikorkeakoulututkinto, Software Engineer (MSc)
- Technology Entrepreneurship, [Industrial Engineering and Management](#) in Lappeenranta University of Technology DI (MSc)
- Software Engineering Program, EVTOL, Software Engineer (BSc)
- ICT Project Manager Program, datanomi (BSc), Amiedu
- Johtamisen ja yritysjohtamisen erikoisammattitutkinto (JYET), Leadership Program, Business College
- Matriculation examination, Myyrmäen lukio.

## Certifications

- AWS Architect Associate 2022. AWS Practitioner 2020.

# Curriculum Vitae

2(26)

August 12<sup>th</sup>, 2022

- Foundation Certificate for Security, CISSP, 2022
- Level C Certified Project Management Professional, IPMA (International Project Management Association), 2022-2023.
- Microsoft Azure Academy, Microsoft Academy, Saranen. 2017-2018.
- Microsoft BizSpark 2015-2017. Building workloads with .NET. Azure Microsoft Visual Studio 2015 Professional.

## Risto Anton's Skills

| Competence Area (as of 2022 situation)  | Experience In years / IQ Level (1-5) | Projects and available solutions   |
|---|--------------------------------------|--|
| Leading the consultative solution sales<br>Client engagement Skills                 | 15 / 4                               | Lifetime Group delivers solutions and services based on the cloud. We offer international sourcing teams through Lifetime Certified Partners Consortium.   |
| Leading project sales<br>observing their productivity<br>communicating,<br>delivery | 15 / 4                               | <p>Daily work includes solution sales; understanding the customer gaps, understanding technology stacks, negotiating with customers, defining solutions and its scope, preparing business cases and learning from case studies, writing project plans including key Milestones, budget tracking, technology approach, delivering budget reports and managing deviances, creating project communications.</p> <p>Accountable for the overall ownership for all customers assigned to the Customer Portfolio and building strong relationships with the decision-makers and influencers of the clients.</p> <p>Manages and organizes sales activities and leads and drives performance to ensure volume and revenue targets are met.</p> <p>Identify clients' business strategies and objectives, needs and buying criteria to develop and articulate value-based solutions to address their needs and wants.</p> <p>Accountable for identifying all relevant opportunities as per company growth strategy, through collaboration with both internal and external stakeholders.</p> <p>Leading Customer and vertical based tailor-made solutions in line with company strategy.</p> <p>Generates new opportunities and develops local differentiators and formulates a business plan to support target delivery.</p> <p>Ensures sales systems and reporting are up to date for management tracking, analysis and planning.</p> |

## My AI Voice Interview

(Answers updated 08/2022, transcript)

Google has released a new tool for practicing job interviews with an AI coach called [Interview Warmup](#). The website is part of the company's Grow With Google program and uses speech-to-text and natural language processing to mimic a job interview for five different technical roles or a non-specific position.

### What are you looking for in your next job?

As a Data Architect I want to analyze data sources and analyze data to find great solutions to the customer issues raised that they are facing in their business. To show customers data in appealing form is important, whether we use Tableau, Office 365 and build Power Apps for client workflows.

As a Cloud Architect the building of new services for customer needs is important. Securing business continuity, low RiskIQ Identity Access Management, Observability, Monitoring, Containerization, SaaSes. Then there is security, Disaster Recovery Planning (DR), for example Business Continuity and Disaster Recovery and their toolsets.

As Cloud Developer Building solid DevOps pipelines and teams associated with the right tooling and effective builds that follow secure policies like Snyk tooling, Git, Among others. IaC Scripts. I may lead a team or be a team member. I also think PowerApps like no code/low code workflows and automation will play a major role in many work duties in the near future.

### Tell me about a time you had to deliver on multiple competing priorities. What did you do, and what were the results?

When there are multiple competing priorities, first, me and my team must prioritize and sort out which top three solutions and answers we need to solve urgently for the client. We need to analyze the gathered information and then make informed decisions in daily meetings.

At a strategic level, we want to make a critical road map for the following priorities for the company to prioritize the project portfolio and to then make it easy to meet the goals that our customer has set for us.

### You're putting together a presentation for a client using several data visualizations. What steps would you take in your final review of the presentation to make sure the information is clearly communicated?

August 12<sup>th</sup>, 2022

In the presentation my team would state the problem first. then we would state the solution if available. Third, we would pinpoint the steps needed from the customer and from our side to reach a Go/No Go decision to deliver the solution to the customer problem.

**When do you try to push through and solve a problem on your own, and when do you involve others on your team?**

We need to make informed decisions after reviewing our team members' strengths and weaknesses, skills and capabilities to see which combination gives the best answer to solving the problem, and who will carry out delivering the solution.

**Liite 1: Syventävän seminaarin erityiskysymyksiä****Yhteenveto ; Reunalaskennan menetelmät ja valmiudet**

Reunalaskenta (eng. edge computing) perustuu älykkäisiin päätelaitteisiin, joissa toteutetaan tietojenkäsittelyä. Näitä ovat älypuhelimet sekä erilaiset IoT laitteet, kuten kodinkoneet jotka keräävät tietoa ja jalostavat sitä "paikan päällä".

Useimmiten syötteenä tuotettua (eri päätelaitteista, konenäöstä) dataa analysoidaan ja tallennetaan lähellä sen keräyspistettä. Päätelaitteen hallintaa ollaan siirtämässä kontitettuihin käyttöjärjestelmäympäristöihin näiden laitteiden sekä reunalaskentapalvelujen hallittavuuden lisäämiseksi. Esimerkiksi tällaisesta kontitetusta reunalaskentaan soveltuvasta käyttöjärjestelmätoteutuksesta on [Red Hat Enterprise Linux CoreOS \(RHCOS\)](#).

Tällöin konttien orkestrointi suoritetaan pilvipalveluna Red Hat OpenShift alustalla. Palveluja voidaan toteuttaa OpenShift Serverless tekniikalla, joka perustuu open source Knative project -projektiin.

Järjestelmäarkkitehtuurina reunalaskennan toteuttaminen serverless containerisation tekniikoin on kasvava trendi useastakin syystä.

Ensiksikin, serverless mahdollistaa palvelujen toteuttamisen ilman virtuaalikonetta pilvipalvelussa. Näin kyetään välttämään viivettä, joka aiheutuu cold start tilanteesta Function as a Service -palvelun käynnistyessä esimerkiksi Amazon Lambda palveluna. Samalla saavutetaan tiedon siirrosta johtuvan viiveen eliminointia. Kontti voi olla warm standby-tilassa, jolloin palveluvaste on nopea silloin kun heräte saapuu.

Toiseksikin, kun tarvittava palvelu viedään konttitekniikalla laitteeseen, saadaan laitteen ylläpito ja vikatilanteet paremmin hallituiksi. Hajautetun identiteetinhallinnan kautta voidaan rakentaa PoP verkkoja, jossa funktio toteutetaan lähimmässä laitteessa josta funktio on saatavilla.

Reunalaitteiden serverless konttiratkaisun teknologipinoa valittaessa huomioidaan mm. yrityksen aiemmat arkkitehtuuritavoitteet ja –linjaukset esimerkiksi pilvipalveluiden osalta, sekä onko jo valittu jokin tietty pilvipalvelutoimittaja ja siihen perustuva kehityspolku, vai onko yrityksellä pilviagnostinen monitoimittaja pilvi strategia, erilaisten laitteiden, tiedonsiirron (5G, wirepas, jne), sekä konttien orkestroinnin sekä laitekontituksen järjestelmien kyvykkyudet, ylläpito ja sekä jatkuvan kehittämisen roolit, uusien teknologioiden kypsyys, liiketoimintamahdollisuudet sekä

August 12<sup>th</sup>, 2022

toteutusten ROE ja ROI kustannustehokkuus laitteiden elinkaaren sekä konnateknologioiden sekä tiedonsiirron osalta.

Toiseksi on huomioitava ohjelmistoarkkitehtuurit sekä näiden toteutuksen valittu monitoimittajamalli; kuka toteuttaa palveluja, millä teknologiapinolla, sekä miten ja kenen toimesta toteutetaan jatkuva integrointi ja tuotantoonvienti mahdollistaen tuotekehityksen joustavuuden palvelutuotannossa mm. ohjelmoijien ulkoistamisen tai sisäistämisen osalta. Tällöin on asetettava erityistä huomiota esimiesten soft skills taitoihin , henkilöstön kielitaitoon sekä kulttuurisiin taitoihin monikulttuurisissa toimittaja,- kumppani,- ja asiakasympäristöissä.

### Yhteenveto ; Kyberturvallisuuden menetelmät ja valmiudet

pyydä lisätiedot Ristolta +358400319010

SOC is a team of IT security professionals that protects the organization by monitoring, detecting, analyzing, and investigating cyber threats. including helpdesk ticketing, back office support outsourcing services ie. Microsoft Sentinel , special operations teams lead.

Microsoft Sentinel is a scalable, cloud-native solution that provides:

Security information and event management (SIEM)

Security orchestration, automation, and response (SOAR)

Microsoft Sentinel delivers intelligent security analytics and threat intelligence across the enterprise.

With Microsoft Sentinel, you get a single solution for attack detection, threat visibility, proactive hunting, and threat response.

Microsoft Sentinel is your bird's-eye view across the enterprise alleviating the stress of increasingly sophisticated attacks, increasing volumes of alerts, and long resolution time frames.

Collect data at cloud scale across all users, devices, applications, and infrastructure, both on-premises and in multiple clouds.

Detect previously undetected threats, and minimize false positives using Microsoft's analytics and unparalleled threat intelligence.

Investigate threats with artificial intelligence, and hunt for suspicious activities at scale, tapping into years of cyber security work at Microsoft.

Respond to incidents rapidly with built-in orchestration and automation of common tasks.

## Assessment - Risto Anton

### This you can build upon:

You like to see your work in the context of a bigger strategic picture, though at times you may lose sight of this during your everyday work. You try to pursue ambitious plans and goals for your area of responsibility and you usually take into consideration a broad range of factors when forming these plans and goals.

You tend to be well informed about market trends and the activities of customers and competitors. You are oriented to business goals and considerations. You have an eye for new commercial possibilities and are likely to have a positive influence on the growth and profitability of a business.

You consider yourself to be very experienced in your professional area, and try to constantly be up-to-date. With your work, you can use your professional knowledge very effectively for solving problems and reaching goals.

Compared to other participants, it is **much easier** for you to handle the tasks in this test successfully.

### Your result in the English Language subareas are as follows:

Your performance in the area 'fluency' can be described as follows: Compared to other participants, it is **much easier** for you to handle the tasks in this area successfully.

Your performance in the area 'vocabulary' can be described as follows: Compared to other participants, it is **easier** for you to handle the tasks in this area successfully.

Your performance in the area 'spelling' can be described as follows: Compared to other participants, it is **much easier** for you to handle the tasks in this area successfully.

### Numeracy

Your completion of the test was **rather slow**, this means that you completed fewer tasks than most other people in the default time. At the same time you were **extremely accurate** which means that compared to other participants, you answered more tasks correctly.

## Multitask Management

Compared to other participants, it is **easier** for you to handle the tasks in this test successfully.

### This you need to be aware of:

You strive to find a middle ground between a pragmatic approach and the best-quality solution. You thoroughly consider financial factors and keep in-mind possible risks. You could **put more energy** into maintaining **a consistent focus on the end-result**.

You approach tasks in a relatively well planned out and systematic manner. You have certain priorities in mind and are also conscious of the necessary resources that you need to handle a project. You take possible difficulties and hindrances into consideration as far as possible even if you do not always realistically estimate the time required for the planned activities.

You can work effectively both alone and in a team but prefer to concentrate on your own tasks. In familiar groups, you contribute positively to the mood; however, when working with new teams, you may initially be somewhat guarded and reserved. You are happy to contribute to the overall success of the team but also like it when ideas and solutions you have contributed are recognised as such.
