Päärni, *Risto Anton*

Helsinki, Finland

Summary

My name is Risto Anton Päärni, M.Sc./B.Sc. engineer focusing on AWS project
Lifetime Digital Workspace for Intelligent Industries (dws), an InvestEU approved, EBAN funded project at the moment.

I was chosen to participate in Smart Factory/ Industrial internet/ MES /6G Cloud M.S. Program in Metropolia Applied Science 2022-2024, I am currently looking for a company to work with and to deliver a Research / Development Project to the Partner Company with to receive grades and help companies in their competitive edge. My Research goal is about Sustainability and ESG combined with Cloud Computing Smart Factories.

As a professional, I offer three skills / hats to your team, agile Scrum PM GitHub, Cloud Solutions / Data Architect, and Cloud Developer.

As CEO of Lifetime Group I had a backlog of duties of agile coaching, business development, Innovations and Brands Management, and operations of a Technology Company like Sales, Research & Development.

Risto Anton has public cloud experience for more than 10+ years. He is an experienced solutions architect with deep knowledge of customer business cases on AWS, Microsoft Azure, Google Cloud Engine, and with technologies like Kubernetes (k8s) and Docker containerization. Risto Anton has expertise in data architecture design, cloud native based services design and business model based service modeling, APIs, multi-cloud integration solutions and NoSQL / SQL databases. As security practitioner he has skills and knowledge in Securing dev pipelines and he is administrator of Lifetime Group 5 domains solving and managing their hands-on daily security and growth and CX issues.

Education

- Program älykäs teollisuus ko, Metropolia, Ongoing, 2022-2024.

- Master of Industrial Management, DI, Technology Entrepreneurship, LUT,2005-2007.

- Bachelor of Software Engineering, insinööri,1991.
  Metropolia, 1991. ICT Project Manager datanomi, Amiedu, 2017-2018.

- JYET, Leadership Program, BusinessCollege, 2019-2020.

- Matriculation examination, Myyrmäen lukio, 1983-1985.

Certifications

- AWS Architect Associate 2022. AWS Practitioner 2020.

- Foundation Certificate for Security, CISSP, 2022

- Level C Certified Project Management Professional, IPMA (International Project Management Association), 2022-2023.

- Microsoft Azure Academy, Microsoft Academy,Saranen. 2017-2018.

- Microsoft BizSpark 2015-2017.

Project experience

Lifetime Digital Workspace for Intelligent Industries is an award winning project approved by the European Commission found here.

Project name: Lifetime Digital Workspace for Intelligent Industries **Customer:** Lifetime Group Certified Partners Consortium **Time involved:** 05/2018 - present	**Description of project:** What is the goal of the project Montreux (version 4)? What has been achieved so far? What is the desired outcome? **Platform:** AWS, Microsoft Azure AD, Linux AMIs **Backend Services: DynamoDB, S3 datalake, see specs A.** **Frontend Services: Android, iOS, Metaverse** **AWS Services: See Appendix A.** **Own role(s): Project Manager, Cloud Solutions Architect, Developer** **Responsibilities:** • solution architecture for development, testing, production. • database design, data lakehouse design • UI design, mobile application, VR/AR • design and implementation of DevOps and its Security • continuous integration and deployment
Project name: CIMS **Customer:** EBAN **Time involved:** 08/2015 -	**Description of project:** CIMS **Platform:** Microsoft Azure **Software:** HTML5, C# MS SQL Server, IIS **Own role:** Project Manager **Responsibilities:** • managing project team of 5 specialists • requirements specifications • test planning, testing

Career history

Lifetime Consulting 04/2018 - present	**Job Title:** Agile Project Manager **Main responsibilities**: ■ Project Planning, Project Costs, Project Resourcing. ■ Project Portfolio ■ Sprint Audit with agile, kanban, GitHub Actions, JIRA ■ backlog owner ■ Budgeting, Reporting
Lifetime Studios 04/2018 – present	**Job Title:** Cloud Developer **Main responsibilities**: ■ Writing error-free code, Sprints work ■ design and implementation of client solutions ■ administering all testing and environments blue/green ■ testing DevSecOps tooling the client solution/ software
Lifetime Studios	**Job Title:** Cloud Architect **Main responsibilities**: ■ Writing error-free IaC code for Solutions ■ Security of AWS Services ■ Architectural design and implementation of client solutions ■ administration of all testing and environments blue/green ■ Strategy and Roadmap of DevSecOps, AMIs, Subscriptions tooling the client solution/ software. ■ AWS Control Tower Management for Accounts ■ Account Manager for client accounts. ■ Containerization ■ Team Leader for Projects.
Lifetime Oy 04/2018 –	**Job Title:** CEO **Main responsibilities**: ■ client consulting, contracting, sales. ■ Administering site content for multiple customer services. ■ Coding ■ Managing Cloud environments and services. ■ Security

Language skills

Finnish	Native speaker
English	Fluent in project work and remote environments
Swedish	Good Tjänstemans Språkprov
German	Basics
C#, Go, Node.JS, python, GitOps	Fluent

Smart Factory YAMK in Metropolia

Year	Course	Grade	Training provider
2022	Älykkäät teolliset ratkaisut	4 out of 5	Metropolia YAMK tutkinto
2022	Tutkimusmenetelmät ja valmiudet	4 out of 5	Metropolia YAMK
09/2022	Projektien johtaminen		Metropolia YAMK
10/2022	Sovellettu seminaari I	Reunalaskennan valmiudet ja menetelmät	Metropolia YAMK
10/2022-04/2023	Sovellettu seminaari II	Kyberturvallisuuden valmiudet ja menetelmät	Metropolia YAMK
04/2023-12/23	Insinöörityö		Metropolia YAMK
2022	CISSP Certified Information Security Professional	8 ECTS	Metropolia YAMK
2022	AWS Architect Certification		Amazon Web Services
2022	Certified Project Manager		IPMA

My AI Voice Interview (Answers updated)

What are you looking for in your next job?

As a Data Architect I want to analyze data sources and analyze data to find great solutions to the customer issues raised that they are facing in their business. To show customers data in appealing form is important, whether we use Tableau, Office 365, or other client tools.

As a Cloud Architect the building of new services for customer needs is important. Securing business continuity Identity Access Management, Monitoring, Containerization, SaaSes. Then there is security, Disaster Recovery Planning (DR), for example Business Continuity and Disaster Recovery with Amazon S3.

As Cloud Developer Building solid DevOps pipelines and teams associated with the right tooling and effective builds that follow secure policies like Snyk tooling, Git, Among others. IaC Scripts. I may lead a team or be a team member.

Tell me about a time you had to deliver on multiple competing priorities. What did you do, and what were the results?

When there are multiple competing priorities, first, me and my team must prioritize and sort out which top three solutions and answers we need to solve urgently for the client.

and then I want to make a critical road map for those following priorities for the company to prioritize project portfolio and to meet the goals that our customer has set for us.

You're putting together a presentation for a client using several data visualizations. What steps would you take in your final review of the presentation to make sure the information is clearly communicated?

In the presentation my team would state the problem first. then we would state the solution if available. Third, we would pinpoint the steps needed from the customer and from our side to reach a Go/No Go decision to deliver the solution to the customer problem.

How can a subquery help aggregate data?

Subqueries are not generally allowed in aggregate functions. Instead, move the aggregate inside the subquery in SQL.

When do you try to push through and solve a problem on your own, and when do you involve others on your team?

I evaluate our team members. under capabilities along with my own capabilities the see which combination gives the best answer to solving the problem.
